

# Tripple

## Ethereal – Tripple Storyboard Wk7

1. Participants enter the exhibit with their armbands on and locate the wall that corresponds with their color
2. Participants are:
  - a. Instructed to focus on their wall alone, in order to learn the mechanics of the exhibit.
  - b. Given matching graphics to learn with
3. Participants increase their heart rates to view a change in size and color of their graphic
4. Participants decrease their heart rates to view the adverse change in size and color of their graphic
5. Participants are:
  - a. Instructed to explore the differences their heart rates can have on different aspects of the exhibit
  - b. Given representations of their specific aspects of the exhibit to interact with
    - i. #1 – Music
    - ii. #2 – Speed
    - iii. #3 – Color
6. Participants increase their heart rates to explore the changes they have on the aspects of the exhibit
7. Participants decrease their heart rates to explore the adverse changes they can have on the aspects of the exhibit
8. Participants are instructed that the exhibit has begun and they are to explore the differences of a high heart rate and a lower heart rate through collaborative effort
9. Participants test individual effects on the whole exhibit
10. Participants collaborate and create different visuals together
11. The experience ends and the graphics fade to black
